Tab Layout Guide For 8.5” Sheet Edge

Allow for .25” shoulder at either end of the tab bank – this leaves 8” of tab space.
Create an 8” table and divide into even cells (the number of cells = the number of tabs in your bank). Center your tab copy within each cell.
Example: 5th Cut Tab Bank… 8” divided by 5 = 1.6” for each tab…Tab position dimension = 1.6” x .5” (or 1.6” x .25” for quarter inch tab extension)
